Figure 1 shows the time evolution of the probability of finding the system in state  $|1\rangle$  ( $P_1$ ) and state  $|2\rangle$  ( $P_2$ ) as a function of time. The x-axis is labeled 'Time' and ranges from 0 to 10. The y-axis ranges from 0 to 1.  $P_1$  (solid line) starts at 1.0 and decreases to approximately 0.4 at time 10.  $P_2$  (dashed line) starts at 0.0 and increases to approximately 0.6 at time 10. Both curves exhibit oscillatory behavior.

A horizontal timeline bar with a black background and white text. The bar is divided into segments by vertical white lines. The segments are labeled with times: 9:30, 10:00, 10:30, 11:00, 11:30, 12:00, 12:30, 1:00, 1:30. The first segment (9:30 to 10:00) is filled with a white, wavy pattern. The other segments are empty.
